Mr. Tim Paul
Director of Finance
City of Muskegon
Retiree Health Care Plan
933 Terrace Street
Muskegon, MI 49440

Dear Mr. Paul:

Submitted in this report are the results of an Actuarial Valuation of the assets and liabilities associated with the employer financed retiree health benefits provided by the City of Muskegon. The date of the valuation was December 31, 2011. The annual required contributions have been calculated for the fiscal years beginning July 1, 2012 and July 1, 2013.

This report was prepared at the request of the City and is intended for use by the City and those designated or approved by the City. This report may be provided to parties other than the City only in its entirety and only with the permission of the City.

The actuarial calculations were prepared for purposes of complying with the requirements of Statement No. 45 of the Governmental Accounting Standards Board (GASB). In addition, we have included information which may be helpful if there is a trust requiring a GASB Statement No. 43 disclosure. The calculations reported herein have been made on a basis consistent with our understanding of these accounting standards. Determinations of the liability associated with the benefits described in this report for purposes other than satisfying the City of Muskegon's financial reporting requirements may be significantly different than the values shown in this report.

The valuation was based upon information furnished by the City of Muskegon concerning retiree health benefits, individual members, and plan finances. Data was checked for internal consistency, but was not otherwise audited.

To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the City of Muskegon as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board. Please see the following page for additional disclosures required by the Actuarial Standards of Practice. The undersigned are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted,

Curtis Powell, EA, MAAA

Mark Buis, FSA, MAAA

CP/MB:mrp

Additional Disclosures Required by Actuarial Standards of Practice

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law.

This report should not be relied on for any purpose other than the purpose described in the primary communication.

The signing actuaries are independent of the plan sponsor.

The valuation was based upon information furnished by the City of Muskegon, concerning Retiree Health benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal and year-to-year consistency with the last valuation, but did not otherwise audit the data. We are not responsible for the accuracy or completeness of the information provided by the City of Muskegon.

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

Annual Required Contribution and OPEB Cost

This report presents the Annual Required Contribution (ARC), one component of the annual Other Postemployment Benefits (OPEB) cost required to be recognized by the plan sponsor for purposes of complying with the accounting requirements of the Governmental Accounting Standards Board (GASB) Statement No. 45. In addition, the plan may need to comply with GASB Statement No. 43. Please consult with legal counsel and your auditors to determine whether you have a plan for GASB Statement No. 43 purposes.

We have calculated the Annual Required Contribution (ARC) for the fiscal years beginning July 1, 2012 and July 1, 2013 under one interest rate assumption and two amortization periods. Below is a summary of the results. In the first year GASB Statement No. 45 is adopted, the annual OPEB cost is equal to the ARC. In subsequent years, if there is a net OPEB obligation (NOO, see below), the annual OPEB cost is equal to the ARC for the fiscal year plus one year's interest on the net OPEB Obligation plus an adjustment to the ARC.

Employer contributions to an OPEB trust act to reduce the NOO. In addition, actual claims paid on behalf of retirees directly from the employer* might be employer contributions in relation to the ARC and act to reduce the NOO. The ARCs and estimated retiree claims shown below include an adjustment for any implicit rate subsidy present in your pre-65 rates.

* *Claims passed through the trust in the same fiscal year might also be treated as contributions for that year. We recommend all such transactions be discussed with your accounting professional prior to their occurrence.*

Annual Required Contribution	30 Year Amortization Period	26 Year Amortization Period	Estimated Claims Paid for Retirees
Fiscal Year Beginning 2012	\$619,237	\$641,754	\$1,066,447
Fiscal Year Beginning 2013	629,689	652,978	1,143,933

For additional details please see the Section titled "Valuation Results."

EXECUTIVE SUMMARY

Additional OPEB Reporting Requirements – Net OPEB Obligation

In addition to the annual cost described on the previous page, employers will have to disclose a Net OPEB Obligation (or asset). The NOO is the cumulative difference between annual OPEB cost and annual employer contributions in relation to the ARC accumulated from the implementation of Statement No. 45. The NOO is zero as of the beginning of the fiscal year that Statement No. 45 is implemented unless the employer chooses to recognize a beginning balance. The requirements for determining the employer's contributions in relation to the ARC are described in paragraph 13 g. of Statement No. 45. Additional information required to be disclosed in the employer's financial statements is detailed in paragraphs 24 through 27 of Statement No. 45.

Liabilities and Assets

1. Present Value of Future Benefit Payments	\$22,499,406
2. Actuarial Accrued Liability	20,167,535
3. Plan Assets	15,330,644
4. Unfunded Actuarial Accrued Liability (2) – (3)	4,836,891
5. Funded Ratio (3)/(2)	76.0%

The Present Value of Future Benefit Payments (PVFB) is the present value of all benefits projected to be paid from the plan for past and future service to current members. The Actuarial Accrued Liability is the portion of the PVFB allocated to past service by the Plan's funding method (see the Section titled "Actuarial Cost Method and Actuarial Assumptions").

SECTION A
VALUATION RESULTS

**CITY OF MUSKEGON - TOTAL
DEVELOPMENT OF THE ANNUAL REQUIRED CONTRIBUTION**

Contributions for	Development of the Annual Required Contribution	
	<u>Fiscal Year Beginning July 1, 2012</u>	
	<u>30 Year Amortization</u>	<u>26 Year Amortization</u>
Employer Normal Cost	\$ 301,294	\$ 301,294
Amortization of Unfunded Actuarial Accrued Liability	<u>317,943</u>	<u>340,460</u>
Annual Required Contribution (ARC)	\$619,237	\$641,754
	<u>Fiscal Year Beginning July 1, 2013</u>	
Annual Required Contribution (ARC)	\$629,689	\$652,978

The unfunded actuarial accrued liabilities were amortized as a level dollar amount for the General and Fire members and a level percent of active member payroll for all other members, over a period of 30 years and also over a period of 26 years. A 30-year amortization period for unfunded actuarial accrued liabilities is the maximum period that complies with the GASB requirements.

The long term rate of investment return used in this valuation is 8.00%.

**CITY OF MUSKEGON - TOTAL
DETERMINATION OF UNFUNDED ACTUARIAL LIABILITY
AS OF DECEMBER 31, 2011**

A. Present Value of Future Benefits	
i) Retirees and Beneficiaries	\$13,228,960
ii) Vested Terminated Members	565,269
iii) Active Members	<u>8,705,177</u>
Total Present Value of Future Benefits	\$22,499,406
B. Present Value of Future Normal Costs	2,331,871
C. Actuarial Accrued Liability (A.-B.)	20,167,535
D. Actuarial Value of Assets	15,330,644
E. Unfunded Actuarial Accrued Liability (C.-D.)	\$4,836,891
F. Funded Ratio (D./C.)	76.0%

The Unfunded Actuarial Accrued Liability (UAAL) is not booked as an expense all in one year and does not appear in the Employer's Statement of Net Assets. Nevertheless, it is reported in the Notes to the Financial Statements and in the Required Supplementary Information. These are information sections within the employer's financial statements.

**ANNUAL REQUIRED CONTRIBUTIONS
COMPARISON BY OPEB REPORT GROUP
AS OF DECEMBER 31, 2011**

OPEB Report Group	Annual Required Contribution for July 01, 2012 - June 30, 2013	
	<u>30 Year Amortization</u>	<u>26 Year Amortization</u>
General	\$ 185,235	\$ 189,184
Police/Fire	<u>434,002</u>	<u>452,570</u>
Total	\$619,237	\$641,754

OPEB Report Group	Annual Required Contribution for July 01, 2013 - June 30, 2014	
	<u>30 Year Amortization</u>	<u>26 Year Amortization</u>
General	\$ 182,515	\$ 186,464
Police/Fire	<u>447,174</u>	<u>466,514</u>
Total	\$629,689	\$652,978

CITY OF MUSKEGON - GENERAL
DEVELOPMENT OF THE ANNUAL REQUIRED CONTRIBUTION

Contributions for	Development of the Annual Required Contribution	
	<u>Fiscal Year Beginning July 1, 2012</u>	
	<u>30 Year Amortization</u>	<u>26 Year Amortization</u>
Employer Normal Cost	\$ 89,902	\$ 89,902
Amortization of Unfunded Actuarial Accrued Liability	<u>95,333</u>	<u>99,282</u>
Annual Required Contribution (ARC)	\$185,235	\$189,184
	<u>Fiscal Year Beginning July 1, 2013</u>	
Annual Required Contribution (ARC)	\$182,515	\$186,464

The unfunded actuarial accrued liabilities were amortized as a level dollar amount, over a period of 30 years and also over a period of 26 years. A 30-year amortization period for unfunded actuarial accrued liabilities is the maximum period that complies with the GASB requirements.

The long term rate of investment return used in this valuation is 8.00%.

**CITY OF MUSKEGON - GENERAL
DETERMINATION OF UNFUNDED ACTUARIAL LIABILITY
AS OF DECEMBER 31, 2011**

A. Present Value of Future Benefits	
i) Retirees and Beneficiaries	\$2,197,883
ii) Vested Terminated Members	281,571
iii) Active Members	<u>2,635,593</u>
Total Present Value of Future Benefits	\$5,115,047
B. Present Value of Future Normal Costs	639,048
C. Actuarial Accrued Liability (A.-B.)	4,475,999
D. Actuarial Value of Assets	3,402,496
E. Unfunded Actuarial Accrued Liability (C.-D.)	\$1,073,503
F. Funded Ratio (D./C.)	76.0%

The Unfunded Actuarial Accrued Liability (UAAL) is not booked as an expense all in one year and does not appear in the Employer's Statement of Net Assets. Nevertheless, it is reported in the Notes to the Financial Statements and in the Required Supplementary Information. These are information sections within the employer's financial statements.

**CITY OF MUSKEGON – POLICE/FIRE
DEVELOPMENT OF THE ANNUAL REQUIRED CONTRIBUTION**

Contributions for	Development of the Annual Required Contribution	
	<u>Fiscal Year Beginning July 1, 2012</u>	
	<u>30 Year Amortization</u>	<u>26 Year Amortization</u>
Employer Normal Cost	\$ 211,392	\$ 211,392
Amortization of Unfunded Actuarial Accrued Liability	<u>222,610</u>	<u>241,178</u>
Annual Required Contribution (ARC)	\$434,002	\$452,570
	<u>Fiscal Year Beginning July 1, 2013</u>	
Annual Required Contribution (ARC)	\$447,174	\$466,514

The unfunded actuarial accrued liabilities were amortized as a level dollar amount for Fire active members and a level percent of active member payroll for all other members, over a period of 30 years and also over a period of 26 years. A 30-year amortization period for unfunded actuarial accrued liabilities is the maximum period that complies with the GASB requirements.

The long term rate of investment return used in this valuation is 8.00%.

CITY OF MUSKEGON – POLICE/FIRE
DETERMINATION OF UNFUNDED ACTUARIAL ACCRUED LIABILITY
AS OF DECEMBER 31, 2011

A. Present Value of Future Benefits	
i) Retirees and Beneficiaries	\$11,031,077
ii) Vested Terminated Members	283,698
iii) Active Members	<u>6,069,584</u>
Total Present Value of Future Benefits	\$17,384,359
B. Present Value of Future Normal Costs	1,692,823
C. Actuarial Accrued Liability (A.-B.)	15,691,536
D. Actuarial Value of Assets	11,928,148
E. Unfunded Actuarial Accrued Liability (C.-D.)	\$3,763,388
F. Funded Ratio (D./C.)	76.0%

The Unfunded Actuarial Accrued Liability (UAAL) is not booked as an expense all in one year and does not appear in the Employer's Statement of Net Assets. Nevertheless, it is reported in the Notes to the Financial Statements and in the Required Supplementary Information. These are information sections within the employer's financial statements.

COMMENTS

COMMENT A: One of the key assumptions used in any valuation of the cost of postemployment benefits is the rate of return on the assets that will be used to pay Plan benefits. Higher assumed investment returns will result in a lower ARC. Lower returns will tend to increase the computed ARC. As requested by the Plan Sponsor we have calculated the liability and the resulting ARC using an assumed long-term rate of investment return of 8.00%. If the Plan Sponsor chooses to pre-fund with contributions less than the ARC (or not pre-fund at all), GASB requires the use of a lower rate of return on assets. Use of such an interest rate would considerably increase the ARC and the net OPEB obligation that is disclosed on the employer's financial statements.

COMMENT B: Based on the number of plan members as of this valuation, the plan sponsor is required by GASB to perform actuarial valuations at least biennially unless there are significant changes in the OPEB.

COMMENT C: The contribution rates shown include amortization of the unfunded actuarial accrued liability over a period of 30 years and also over a period of 26 years. 30 years is the maximum time period permitted by the GASB Statement No. 45. Shorter amortization periods result in a larger ARC.

COMMENT D: Assets were allocated to the General and Police/Fire divisions in proportion to each division's Actuarial Accrued Liability.

COMMENT E: Changes related to the Patient Protection and Affordable Care Act are reflected to the extent they are already implemented in the Plan. Future changes will be reflected as they become effective.

COMMENT F: The Annual Required Contributions shown in this report have decreased significantly from those developed in the last annual valuation. The decline is primarily the result of favorable claims experience during 2010 and 2011 and the new plan provisions implemented. In particular post retirement drug coverage was eliminated for Command Members and Post-65 Drug Coverage was eliminated for Police Patrol.

COMMENTS

COMMENT G: Certain City of Muskegon employees are not covered by the City's Retiree Health Care Plan. It has been assumed that these employees will not incur any health care liability in the Retiree health Care Plan.

COMMENT H: The Actuarial Standards of Practice with regard to the mortality assumption has recently been revised. ASOP No. 35 Disclosure 4.1.1 now states "*The disclosure of the mortality assumption should contain sufficient detail to permit another qualified actuary to understand the provision made for future mortality improvement. If the actuary assumes zero mortality improvement after the measurement date, the actuary should state that no provision was made for future mortality improvement.*" As such, there is currently no margin for future mortality improvement in the current mortality assumption. We anticipate updated mortality rates including a margin for mortality improvements will be recommended for the next valuation. This will likely put upward pressure on liabilities.

SECTION B

RETIREE PREMIUM RATE DEVELOPMENT

RETIREE PREMIUM RATE DEVELOPMENT

Initial premium rates were developed separately for each class (pre-65 and post-65). The rates were calculated by using actual paid retiree claims and exposure data for the period of January 2009 to December 2011, adjusted for catastrophic claims, plus the load for administration fees. The self-insured Medical and prescription drug retiree data were provided by the City of Muskegon. The Medical data was analyzed for the pre-65 and post-65 participants separately since Medicare is available for the post-65 participants and has a significant impact on the claim experience. Furthermore, since the prescription drug claims and the medical claims exhibit different trends and claim payment patterns, we analyzed these claims separately as well. The initial per capita costs are based on a weighted average of 2009, 2010, and 2011 claims. We then compared our per capita claims development to Humana's recommended rates and found them to be consistent.

Age graded and sex distinct premiums are utilized in this valuation. The premiums developed by the preceding process are appropriate for the unique age and sex distribution currently existing. Over the future years covered by this valuation, the age and sex distribution will most likely change. Therefore, our process "distributes" the average premium over all age/sex combinations and assigns a unique premium for each specific age/sex combination. The age/sex specific premiums more accurately reflect the health care utilization and cost at that age.

RETIREE PREMIUM RATE DEVELOPMENT

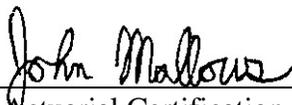

The tables below show the resulting medical and prescription drug one-person monthly premiums at select ages. The premium (or per capita costs) rates shown below reflect the use of age grading.

For Those Not Eligible for Medicare (Pre-65)				
Age	Medical		Rx	
	Male	Female	Male	Female
40	\$ 97.09	\$ 152.12	\$ 70.33	\$ 110.19
50	178.48	202.22	129.28	146.48
60	293.05	281.68	212.27	204.04
64	341.09	316.16	247.07	229.01

For Those Eligible for Medicare (Post-65)				
Age	Medical		Rx	
	Male	Female	Male	Female
65	\$ 105.54	\$ 97.19	\$ 255.47	\$ 235.25
75	135.15	119.94	327.15	290.34
85	150.70	132.31	364.80	320.27

We did not “age grade” the dental premium rates for this valuation, since dental claims do not vary significantly by age. The dental premium used in this valuation for the select group of Fire members eligible for dental coverage prior to attaining age 65 was \$24.94 per person per month.

The undersigned is a Member of the American Academy of Actuaries and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

 Actuarial Certification
 John Mallows FSA, MAAA

SECTION E

ACTUARIAL COST METHOD AND ACTUARIAL ASSUMPTIONS

**ACTUARIAL METHODS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

Actuarial Cost Method. Normal cost and the allocation of benefit values between service rendered before and after the valuation date was determined using an **Individual Entry-Age Actuarial Cost Method** having the following characteristics:

- (i) the annual normal cost for each individual active member, payable from the date of employment to the date of retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement;
- (ii) each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Actuarial gains (losses), as they occur, reduce (increase) the Unfunded Actuarial Accrued Liability.

Financing of Unfunded Actuarial Accrued Liabilities. Unfunded actuarial accrued liabilities (UAAL) (full funding credit if assets exceed liabilities) were amortized as a level percent of payroll if the divisions are open to new hires and as a level dollar if the divisions are closed to new hires. The UAAL was determined using the actuarial value of assets and actuarial accrued liability calculated as of the valuation date and projected to the beginning of the fiscal year at the assumed rate of investment return.

Actuarial Value Assets. The Actuarial Value of Assets is set equal to the reported market value of assets.

**ACTUARIAL METHODS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

The following amortization factors were used in developing the Annual Required Contribution for the fiscal years shown:

General Level Dollar	Fiscal Year Beginning July 01,	
	2012	2013
30 Year Amortization	11.7023	11.5990
26 Year Amortization	11.2368	11.0963

Police/Fire Level Percent of Pay and Level Dollar	Fiscal Year Beginning July 01,	
	2012	2013
30 Year Amortization	17.5690	17.2782
26 Year Amortization	16.2164	15.8667

**ACTUARIAL ASSUMPTIONS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

The rate of investment return was 8.00% a year, compounded annually net after investment expenses.

The rates of salary increase used for individual members are in accordance with the following table. This assumption is used to project a member's current salary to the salaries upon which future contributions will be based.

Sample Ages	% Increase in Salary at Sample Ages		
	Merit & Seniority	Base (Economic)	Increase Next Year
20	8.40 %	4.50 %	12.90 %
25	5.33	4.50	9.83
30	3.26	4.50	7.76
35	2.05	4.50	6.55
40	1.30	4.50	5.80
45	0.81	4.50	5.31
50	0.52	4.50	5.02
55	0.30	4.50	4.80

The payroll growth rate for financing Unfunded Actuarial Accrued Liabilities for open divisions was assumed to be 4.50% per year.

**ACTUARIAL ASSUMPTIONS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

The rates of post retirement mortality used for individual members are in accordance with the following tables.

For healthy retirees, mortality rates are based on the 1994 Group Annuity Mortality Tables blended 50% male/50% female. Sample rates are as follows:

Sample Attained Ages	Probability of Dying Next Year (Healthy)	Future Life Expectancy (years)
50	0.20%	32.60
55	0.34	27.98
60	0.62	23.53
65	1.16	19.40
70	1.87	15.66
75	2.99	12.24
80	5.07	9.25

There is currently no margin for future mortality improvements included in these rates.

**ACTUARIAL ASSUMPTIONS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

For disabled retirees, mortality rates are based on the healthy life table on the previous page, but set forward ten years. Sample rates are as follow:

Sample Attained Ages	Probability of Dying Next Year (Disabled)	Future Life Expectancy (years)
50	0.62%	23.53
55	1.16	19.40
60	1.87	15.66
65	2.99	12.24
70	5.07	9.25
75	8.25	6.81
80	13.46	4.85

These assumptions are used to measure the probabilities of each benefit payment being made after retirement.

The same mortality tables are used for active members with 90% of active deaths assumed non-duty and 10% assumed duty related.

**ACTUARIAL ASSUMPTIONS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

Retirement Rates

A schedule of retirement rates is used to measure the probability of eligible members retiring during the next year. To reflect the impact plan design may have on retirement experience, separate retirement rates apply to valuation divisions with pension benefit multipliers less than or equal to 2.50% and greater than 2.50%. Certain Retirement ages may not apply, depending on the benefit age of first eligibility.

Normal Retirement - Age Based Benefit Provisions - F(N) Not Adopted

Retirement Ages	Percent of Eligible Active Members Retiring Within Next Year*	
	Less than or equal to 2.50%	Greater than 2.50%
50	20%	23%
51	20	23
52	20	24
53	20	26
54	20	26
55	20	30
56	20	33
57	21	35
58	21	39
59	21	42
60	21	43
61	22	48
62	22	49
63	22	49
64	23	50
65	25	50
66	25	50
67	26	50
68	28	50
69	30	50
70	100	100

**For those eligible prior to age 50, the retirement rate is 22% per year. Members in a defined contribution plan follow the retirement pattern of those with a defined benefit of less than or equal 2.50% per year.*

**ACTUARIAL ASSUMPTIONS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

Early Retirement - Reduced Pension Benefit

Retirement Ages	Percent of Eligible Active Members Retiring Within Next Year
50	2%
51	2
52	3
53	5
54	8
55	4
56	4
57	4
58	6
59	8

**ACTUARIAL ASSUMPTIONS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

Rates of separation from active membership are used to estimate the number of employees at each age that are expected to terminate employment before qualifying for retirement benefits. The rates of separation from active membership do not apply to members eligible to retire, and do not include separation on account of death or disability. The assumed rates of separation applied in the current valuation are based on years of service, and scaled up or down according to each group's experience.

Group	Separation Rate Scaling Factor
All Divisions	100%

The base separation rates (see the table below) are multiplied by the scaling factor to obtain the assumed withdrawal rates. Sample rates of separation from active employment, before application of the scaling factor, are shown below.

Sample Years of Service	% of Active Members Separating Within the Next Year
0	20.00%
1	17.00
2	14.00
3	11.00
4	9.00
5	6.50
10	5.00
15	3.70
20	3.00
25	2.70
30	2.60
34 and over	2.40

**ACTUARIAL ASSUMPTIONS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

Disability Rates

Disability rates are used in the valuation to estimate the incidence of member disability in future years.

The assumed rates of disablement at various ages are shown below.

Sample Ages	Percent Becoming Disabled Within the Next Year
20	0.02%
25	0.02
30	0.02
35	0.06
40	0.06
45	0.11
50	0.24
55	0.41
60	0.41
65	0.41

85% of the disabilities are assumed to be non-duty and 15% of the disabilities are assumed to be duty related. For those plans which have adopted disability provision D-2, for pension benefit purposes, 70% of the disabilities are assumed to be non-duty and 30% are assumed to be duty related.

**ACTUARIAL ASSUMPTIONS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011 (CONCLUDED)**

Health care cost trend rates are displayed in the following table:

Year After Valuation	Health Care Trend Inflation Rates
	Medical/Drug
1	9.00%
2	8.50
3	8.00
4	7.50
5	7.00
6	6.50
7	6.00
8	5.50
9	5.00
10	4.50
11	4.50
12	4.50
13	4.50
14	4.50
15	4.50
16 +	4.50

**MISCELLANEOUS AND TECHNICAL ASSUMPTIONS FOR
CITY OF MUSKEGON
AS OF DECEMBER 31, 2011**

Administrative Expenses	No explicit assumption has been made for administrative expenses.
Decrement Operation	Disability and withdrawal do not operate during retirement eligibility.
Decrement Timing	Decrements of all types are assumed to occur mid-year.
Eligibility Testing	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
Incidence of Contributions	Contributions are assumed to be received continuously throughout the year based upon the computed contribution shown in this report.
Marriage Assumption	70% of males and 70% of females are assumed to be married at time of decrement. Male spouses are assumed to be three years older than female spouses for active member valuation purposes.
Medicare Coverage	Assumed to be available for all covered employees on attainment of age 65. Disabled retirees were assumed to be eligible for Medicare coverage at age 65.
Health Care Coverage at Retirement	The table below shows the assumed portion of future retirees electing one-person or two-person/family coverage, or opting out of coverage entirely.

	One-Person	Two-Person/Family		Opt-Out
		Electing	Continuing	
General				
Pre Age 65	35%	65%	100%	0%
Post Age 65	9%	16%	100%	75%
Police/Fire				
Pre Age 65	25%	75%	100%	0%
Medical Post Age 65	8%	22%	100%	70%
Rx Post Age 65	25%	75%	100%	0%

Opt-Out	For those post 65 retirees currently opting out of health coverage, it was assumed that they will continue to opt out of coverage.

APPENDIX A
OVERVIEW

GASB BACKGROUND

The purpose of this valuation is to provide information on the cost associated with providing postemployment benefits other than pensions, or OPEB, to current and former employees. The information is designed to assist you in complying with Governmental Accounting Standards Board (GASB) Statements No. 43 and No. 45. OPEB benefits are most often associated with postemployment health care, but cover almost any benefit not provided through a pension plan, including life insurance, dental and vision benefits. It is important to note that OPEB benefits, by definition, do not include benefits *currently* being provided to active employees – however, this report includes the liabilities for benefits expected to be paid to current active employees in the future when they retire.

GASB Statements No. 43 and No. 45 were released in the spring of 2004. GASB Statement No. 43 covers the accounting rules for OPEB *plans* while GASB Statement No. 45 describes the rules for *employers* sponsoring OPEB plans. Your auditor can assist you in determining which statements apply to your particular situation.

The specific items required to be disclosed on an OPEB sponsor's financial statements are described in detail in GASB Statements No. 43 and No. 45.

GASB Statement No. 45

Among the requirements of Statement No. 45 are recognition each year of an expense called the Annual OPEB Cost, and the accumulation of a liability to be disclosed on the employer's Statement of Net Assets called the Net OPEB Obligation (NOO).

The fundamental items required to determine the Annual OPEB Cost and the NOO are:

- the Annual Required Contribution (ARC)
- the Employer's Contributions in relation to the ARC

Although GASB does not require OPEB contributions, it has chosen to call the base component of the annual OPEB cost the Annual Required Contribution. The ARC is provided in this report.

GASB BACKGROUND (CONCLUDED)

Paragraph 13g. of Statement No. 45 states:

“An employer has made a contribution in relation to the ARC if the employer has:

1. made payments of benefits directly to or on behalf of a retiree or beneficiary,
2. made premium payments to an insurer, or
3. irrevocably transferred assets to a trust, or equivalent arrangement in which Plan assets are dedicated to providing benefits to retirees and their beneficiaries in accordance with the terms of the Plan and are legally protected from creditors of the employer(s) or plan administrator.”

For each fiscal year shown in this report, we have provided the ARC and the estimated benefits and/or premiums (based on valuation assumptions).

The NOO is the cumulative difference between the Annual OPEB Cost each year and the Employer’s Contribution in relation to the ARC. The Annual OPEB Cost for a year is equal to:

- the ARC, plus
- interest on the prior year’s NOO, plus
- amortization of the prior year’s NOO.

The Annual OPEB Cost and NOO are generally developed by the Plan Sponsor’s auditor based on information contained herein and elsewhere.

GASB Statement No. 43

If the Plan has assets for Statement No. 43 purposes, then certain additional information useful in complying with the Statement is contained in this report.

OPEB PRE-FUNDING

Many employers fund retiree health care benefits using the pay-as-you-go (or cash disbursement) method. Under this method, the employer's annual contribution is equal to the actual disbursements during the year for OPEB for retired employees. This method of funding will result in increasing contributions over time. First, per capita cash disbursements will tend to increase from year to year as the cost of health care services, or the utilization of these services, increases. Second, the number of retired members is likely to increase for years to come. The more retirees, the greater the disbursements as a percentage of employee payroll.

A retiree health care plan is similar to a defined benefit pension plan in that promises are made to employees to provide them with a benefit payable at some future date. For defined benefit pension plan sponsors, a common funding objective is to contribute to a fund, annual amounts which will i) remain level as a percentage of active member payroll, and ii) when combined with present assets and future investment return be sufficient to meet the financial obligations of the Plan to current and future retirees.

The GASB statements are not funding requirements. They are accounting standards that require plan sponsors to calculate the annual expense associated with OPEB using certain methods.

The ultimate determination as to the level of pre-funding will be the result of decisions made in an attempt to support benefit security for members and the fiscal management needs of the employer.

APPENDIX B

GLOSSARY

Accrued Service. The service credited under the plan which was rendered before the date of the actuarial valuation.

Actuarial Accrued Liability. The difference between (i) the actuarial present value of future plan benefits, and (ii) the actuarial present value of future normal cost. Sometimes referred to as "accrued liability" or "past service liability".

Actuarial Assumptions. Estimates of future plan experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Decrement assumptions (rates of mortality, disability, turnover and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (salary increases and investment income) consist of an underlying rate in an inflation-free environment plus a provision for a long-term average rate of inflation.

Actuarial Cost Method. A mathematical budgeting procedure for allocating the dollar amount of the "actuarial present value of future plan benefits" between the actuarial present value of future normal cost and the actuarial accrued liability. Sometimes referred to as the "actuarial funding method".

Actuarial Equivalent. A single amount or series of amounts of equal value to another single amount or series of amounts, computed on the basis of the rate(s) of interest and mortality tables used by the plan.

Actuarial Present Value. The amount of funds presently required to provide a payment or series of payments in the future. It is determined by discounting the future payments at a predetermined rate of interest, taking into account the probability of payment.

Amortization. Paying off an interest-bearing liability by means of periodic payments of interest and principal, as opposed to paying it off with a lump sum payment.

GLOSSARY

Annual Required Contribution (ARC). The ARC is the normal cost plus the portion of the unfunded actuarial accrued liability to be amortized in the current period. The ARC is an amount that is actuarially determined in accordance with the requirements so that, if paid on an ongoing basis, it would be expected to provide sufficient resources to fund both the normal cost for each year and the amortized unfunded actuarial accrued liability.

Governmental Accounting Standards Board (GASB). GASB is the private, nonpartisan, nonprofit organization that works to create and improve the rules U.S. state and local governments follow when accounting for their finances and reporting them to the public.

Implicit Rate Subsidy. It is common practice for employers to allow retirees to continue in the employer's group health insurance plan (which also covers active employees), often charging the retiree some portion of the premium charged for active employees. Under the theory that retirees have higher utilization of services, the difference between the true cost of providing retiree coverage and what the retiree is being charged is known as the implicit rate subsidy.

Medical Trend Rate (Health Care Inflation). The increase in the cost of providing health care benefits over time. Trend includes such elements as pure price inflation, changes in utilization, advances in medical technology, and cost shifting.

Normal Cost. The annual cost assigned, under the actuarial funding method, to current and subsequent plan years. Sometimes referred to as "current service cost." Any payment toward the unfunded actuarial accrued liability is not part of the normal cost.

Other Postemployment Benefits (OPEB). OPEB are postemployment benefits other than pensions. OPEB generally takes the form of health insurance, dental, vision, prescription drugs, life insurance or other health care benefits.

Reserve Account. An account used to indicate that funds have been set aside for a specific purpose and are not generally available for other uses.

GLOSSARY

Unfunded Actuarial Accrued Liability. The difference between the actuarial accrued liability and valuation assets. Sometimes referred to as "unfunded actuarial accrued liability."

Valuation Assets. The value of current plan assets recognized for valuation purposes.
