Hi Mayor! Need a favor. Is it possible for me to get 15 minutes of the commission's attention at a meeting? I don't know if you are familiar with the Red Project out of GR or not, but they have opened a naloxone distribution program here in Muskegon in conjunction with HealthWest. They are very interested in doing a needle exchange as well. The program that they have in GR has been exceptionally successful at reducing HIV and Hep C rates among needle users. They would like to educate the commissioners and hopefully get their blessing on beginning the process. I will be there in my public health capacity to answer any questions on communicable disease as well. Can we get on the agenda?

If yes, can you give me a date to shoot for?

Jill
