

City of Muskegon

Steps to obtaining a Lawn Meter

1. What is the location of existing water meter?
 - If it is inside the home great.
 - If it is in a meter pit outside there is a lot more to it. You would have run a new line from the meter pit to the home at Homeowners expense.
2. Call Water Dept. for location if not known(724-6989 or 724-6988)
3. Obtain Plumbing permit from Safebuilt(724-6715)..
4. Either a Plumber or Homeowner can pull a permit. You will have to split your service inside home and purchase a new meter for irrigation. The meter charge will go on your Water bill. Call Water Department for pricing.
5. You will need a backflow device on new irrigation system based on the Michigan Plumbing Code.
6. Call Safebuilt for final inspection when work is complete.
7. When inspection has been approved you need to sign up for a Lawn account at the Treasury office at City Hall.
8. Final step is to call 724-4100 for appointment to have the new lawn meter set.
