### 1.10 DBE/MBE/WBE PROCUREMENT POLICY

#### 1.10.1 POLICY STATEMENT: 2014-31 (e)

It is the policy of the City of Muskegon to assure that small disadvantaged business enterprises (DBE), minority business enterprises (MBE), and woman-owned business enterprises (WBE) are given the opportunity to participate in contracting and procurement for supplies, construction, equipment and services under federal contracts and collaborations.

This policy applies to all contracts/procurement for supplies, construction equipment and services under any federally contracted grant or cooperative agreement. The purpose is to ensure nondiscrimination in the solicitation, either by competitive bidding or negotiation, and award and administration of federally assisted contracts and collaborations.

Entities contracting or sub-contracting with the City of Muskegon shall comply with regulations relative to nondiscrimination in Federally-assisted programs as amended from time to time (hereinafter referred to as the Regulations), which are herein incorporated by reference and made a part of this contract.

During the performance of any contract, the contractor, for itself, its assignees and successors in interest (hereinafter referred to as the “contractor”) agrees, as follows:

#### 1.10.2 STATEMENT OF NON-DISCRIMINATION

The contractor, with regard to the work performed by it during the contract, shall not discriminate on the grounds of race, color, sex, or national origin in the selection, retention, and treatment of subcontractors, including procurements of supplies, construction, equipment and services.

#### 1.10.3 FAIR SHARE GOALS

All methods of solicitation shall include the following language to meet “Good Faith Effort” requirements as stated in the general provisions of EPA’s 40 CFR 33 of the Federal Regulation:

*This contract is subject to the Environmental Protection Agency’s (EPA) “fair share policy,” which includes EPA-approved “fair share goals” for Disadvantaged Business Enterprise (DBE), Minority Business Enterprise (MBE) and Woman Business Enterprise (WBE) firms in the Construction, Supplies, Equipment, and Services procurement categories. EPA’s policy requires that applicants and prime contractors make a good faith effort to award a fair share of contracts, subcontracts and procurements to Minority Business Enterprise and Women-Owned Business Enterprise firms. Although EPA’s policy does not mandate that the fair share goals be achieved, it does require applicants and prime contractors to demonstrate use of the six affirmative steps, and adhere to the current fair share goals for the State of Michigan.*

#### 1.10.4 GOOD FAITH EFFORTS

(1) The City of Muskegon shall ensure DBE/MBE/WBEs are made aware of contracting opportunities to the fullest extent practicable through outreach and recruitment activities by maintaining a solicitation list of DBE/MBE/WBE businesses and notifying them whenever they are potential sources.

(a) Maintain and update a listing of qualified DBE/MBE/WBEs that can be solicited for construction, equipment, services and/or supplies on the City of Muskegon website.

(b) Provide listings to all interested parties who request copies of the bidding or proposing documents.

(c) Contact appropriate sources within our geographic area to identify DBE/MBE/WBEs for placement on our business listings.

(d) Utilize other DBE/MBE/WBE listings such as those of the States Minority Business Office, the Small Business Administration, Minority Business Development Agency (MBDA) of the Department of Commerce, EPA OSDBU, DOJ, HUD, DOT and Department of Homeland Security.

(e) Solicitation lists are available for review at all times via the city website.

(2) The City of Muskegon shall make information of forthcoming opportunities available to DBE/MBE/WBEs and arrange time for viewing of contracts and establish delivery schedules, where requirements permit, in a way that encourages and facilitates participation by DBEs, MBEs, and WBEs in the competitive process. This includes, whenever possible, posting solicitations for bids or proposals for a minimum of 30 calendar days(federal projects) and 10 calendar days(local projects), before the bid or proposal closing date.

(a) Develop realistic delivery schedules which may provide for greater DBE/MBE/WBE participation.

(b) Advertise through the minority media in order to facilitate DBE/MBE/WBE utilization. Such advertisements may include, but are not limited to, contracting and subcontracting opportunities, hiring and employment, or any other matter related to the project.

(c) Advertise in general circulation publications, trade publications, State agency publications and minority and women's business focused media concerning contracting opportunities on our projects. Maintain a list of minority and/or women's business-focused publications that may be utilized to solicit DBE/MBE/WBEs.

(3) The City of Muskegon will consider in the contracting process whether firms competing for large contracts could subcontract with DBE/MBE/WBEs. The City of Muskegon will divide total requirements when economically feasible and practical into smaller tasks or quantities in order to increase opportunities for participation by DBE/MBE/WBEs in the competitive process.

(a) Perform an analysis to identify portions of work that can be divided and performed by qualified DBE/MBE/WBEs.

(b) Scrutinize the elements of the total project to develop economical units of work that are within the bonding range of DBE/MBE/WBEs.

(c) Conduct meetings, conferences, and follow-ups with DBE/MBE/WBE associations and minority media to inform these groups of opportunities to provide construction, equipment, services and supplies.

- (4) The City of Muskegon will consider and encourage contracting with a consortium of DBE/MBE/WBEs when a contract is too large for one of these firms to handle individually.
- (a) Notify DBE/MBE/WBEs of future procurement opportunities so they may establish bidding solicitations and procurement plans.
  - (b) Provide DBE/MBE/WBEs trade organizations with succinct summaries of solicitations.
  - (c) Provide interested DBE/MBE/WBEs with adequate information about plans, specifications, timing and other requirements of the proposed projects.
- (5) Use the services and assistance of the Small Business Administration (SBA) and the Minority Business Development Agency (MBDA).
- (a) Use the services of outreach programs sponsored by the MBDA and/or the SBA to recruit bona fide firms for placement on DBE/MBE/WBE bidder's lists to assist these firms in the development of bid packaging.
  - (b) Seek out Minority Business Development Centers (MBDCs) to assist recipients and prime contractors in identifying DBE/MBE/WBEs for potential work opportunities on projects
- (6) If the prime contractor awards subcontractors, the prime contractor is required to take the steps in subparagraphs (1)-(5) of this section.

#### 1.10.5 DOCUMENTATION/REPORTING

The contractor shall provide all information and reports required by the Regulations, or directives issues pursuant thereto, and shall permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by the appropriate federal agency to be pertinent to ascertain compliance with such Regulations or directives. Where any information required of a contractor is in the exclusive possession of another who fails or refuses to furnish this information, the contractor shall so certify to the appropriate State or Federal Agency, as appropriate, and shall set forth what efforts it has made to obtain the information.

#### 1.10.6 NON – COMPLIANCE

- b. No assignment or novation of this Contract shall be valid unless it expressly provides that the assignment of any of the Contractor's rights or benefits under the Contract is subject to a prior lien for labor performed, services rendered, and materials, tools and equipment supplied for the performance of the work under this Contract in favor of all persons, firms or corporations rendering such labor or services, or supplying such materials, tools or equipment.

The City's estimates and decisions shall be final and conclusive, except as herein otherwise expressly provided.

He/She shall have the authority to prevent any material from being used, and to stop any work from being done, which he/she believes does not conform to the plans and specifications, until the Authorized Representative has an opportunity to inspect the material or work. ## **SURFACE PREPARATION STANDARDS**

Your coatings supplier will always designate the degree of surface preparation required for the materials you are using. The basic standards for preparing metal substrates are a joint effort between the Society for Protective Coatings (SSPC) and the National Association of Corrosion Engineers International (NACE).

### **SSPC-SP1 Solvent Cleaning**

Removal of all visible oil, grease, soil, drawing and cutting compounds, and other soluble contaminants from steel surfaces with solvent, vapor, cleaning compound, alkali, emulsifying agent, or steam.

### **SSPC-SP2 Hand Tool Cleaning**

Removes all loose mill scale, loose rust, loose paint, and other loose detrimental foreign matter by hand chipping, scraping, sanding, and wire brushing.

### **SSPC-SP3 Power Tool Cleaning**

Removes all loose mill scale, loose rust, loose paint, and other loose detrimental foreign matter by power wire brushing, power sanding, power grinding, power tool chipping, and power tool descaling.

### **SSPC-SP5 / NACE 1 White Metal Blast Cleaning**

When viewed without magnification, the surface shall be free of all visible oil, grease, dust, dirt, mill scale, rust, coating, oxides, corrosion products and other foreign matter.

### **SSPC-SP6 / NACE 3 Commercial Blast Cleaning**

When viewed without magnification, the surface shall be free of all visible oil, grease, dust, dirt, mill scale, rust, coating, oxides, corrosion products and other foreign matter of at least 66-2/3% of unit area, which shall be a square 3 in. x 3 in. (9 sq. in.). Light shadows, slight streaks, or minor discolorations caused by stains of rust, stains of mill scale, or stains of previously applied coating in less than 33-1/3% of the unit area is acceptable.

### **SSPC-SP7 / NACE 4 Brush-Off Blast Cleaning**

When viewed without magnification, the surface shall be free of all visible oil, grease, dirt, dust, loose mill scale, loose rust, and loose coating. Tightly adherent mill scale, rust, and coating may remain on the surface. Mill scale, rust, and coating are considered tightly adherent if they cannot be removed by lifting with a dull putty knife.

### **SSPC-SP10 / NACE 2 Near-White Blast Cleaning**

When viewed without magnification shall be free of all visible oil, grease, dust, dirt, mill scale, rust, coating, oxides, corrosion products and other foreign matter of at least 95% of each unit area. Staining shall be limited to no more than 5 percent of each unit area, and may consist of light shadows, slight streaks, or minor discolorations caused by stains of rust, stains of mill scale, or stains of previously applied coatings. Unit area shall be approximately 3 in. x 3 in. (9 sq. in.).

### **SSPC-SP11 Power Tool Cleaning to Bare Metal**

When viewed without magnification, the surface shall be free of all visible oil, grease, dirt, dust, mill scale, rust, paint, oxides, corrosion products, and other foreign matter. Slight residues of rust and paint may be left in the lower portion of pits if the original surface is pitted. The surface profile shall not be less than 1 mil (25 microns).

## **SURFACE PREPARATION STANDARDS**

### **SSPC-SP12 / NACE 5 Surface Preparation and Cleaning of Steel and Other Hard Materials by High- and Ultra High- Pressure Water Jetting Prior to Recoating**

This standard requires water jetting at high- or ultra high-pressure to prepare a surface for recoating using pressure above 10,000 psi. Water jetting will not produce a profile; rather, it exposes the original abrasive-blasted surface profile. Water jetting shall be performed to meet four conditions: WJ-1, WJ-2, WJ-3, and WJ-4, and a minimum acceptable surface shall have all loose rust, loose mill scale, and loose coatings uniformly removed.

### **SSPC-SP13 / NACE 6 Surface Preparation of Concrete**

Provides requirements for surface preparation of concrete by mechanical, chemical, or thermal methods prior to the application of bonded protective coating or lining systems.

### **SSPC-SP14 / NACE 8 Industrial Blast Cleaning**

Removal of all visible oil, grease, dust and dirt, when viewed without magnification. Traces of tightly adherent mill scale, rust, and coating residues are permitted to remain on 10% of each unit area of the surface if they are evenly distributed. Shadows, streaks, and discoloration caused by stains of rust, stains of mill scale, and stains of previously applied coating may be present on the remainder of the surface.

## **SURFACE PREPARATION STANDARDS**

### **WATER JETTING STANDARDS**

#### **SSPC-SP12 / NACE 5**

#### **Surface Preparation and Cleaning of Steel and Other Hard Materials by High- and Ultra High- Pressure Water Jetting Prior to Recoating**

This standard requires water jetting at high- or ultra high-pressure to prepare a surface for recoating using pressure above 10,000 psi. Water jetting will not produce a profile; rather, it exposes the original abrasive-blasted surface profile. The specifier shall use one of the visual surface preparation definitions (WJ-1 to WJ-4) and one of the non-visual surface preparation definitions (SC-1 to SC-3) to specify the degree of visible and non-visible surface matter to be removed.

#### **Pressure Categorization**

##### **Low-Pressure Water Cleaning (LP WC)**

Cleaning performed at pressures  
less than 34 Mpa (5,000 psi)

##### **High-Pressure Water Cleaning (HP WC)**

Cleaning performed at pressures  
from 34 to 70 Mpa (5,000 to 10,000 psi)

##### **High-Pressure Water Jetting (HP WJ)**

Cleaning performed at pressures  
from 70 to 170 Mpa (10,000 to 25,000 psi)

##### **Ultrahigh-Pressure Water Jetting (UHP WJ)**

Cleaning performed at pressures  
above 170 Mpa (25,000 psi)

#### **Visual Conditions of Surface Cleanliness**

##### **WJ-1**

visible rust, coatings, mill scale, and foreign matter and  
have a matte metal finish

##### **WJ-2**

Surface shall be cleaned to a matte finish with at least  
95% of the surface area free of all previously existing  
visible residues and the remaining 5% containing only  
randomly dispersed stains of rust, coatings, and foreign  
matter

##### **WJ-3**

stains of previously existing rust, coatings, and foreign  
matter

##### **WJ-4**

Surface shall have all loose rust, loose mill scale, and  
loose coatings uniformly removed

#### **Non-Visual Conditions of Surface Cleanliness**

##### **SC-1**

Surface shall be free of all detectable levels of  
contaminants as determined using available field test  
equipment with sensitivity approximating laboratory test  
equipment. For purposes of this standard, contaminants  
are water-soluble chlorides, iron-soluble salts, and  
sulfates

##### **SC-2**

Surface shall have less than 7 µg/cm<sup>2</sup> chloride  
contaminants, less than 10 µg/cm<sup>2</sup> of soluble ferrous ion

### APPLICATION CONDITIONS

Condition	Material	Surface	Ambient	Humidity
Minimum	50°F (10°C)	50°F (10°C)	50°F (10°C)	0%
Maximum	90°F (32°C)	200°F (93°C)	100°F (38°C)	95%

This product simply requires the substrate temperature to be above the dew point. Condensation due to substrate temperatures below the dew point can cause flash rusting on prepared steel and interfere with proper adhesion to the substrate. Special application techniques and/or thinning may be required for application when conditions are above and below normal application conditions.

### CURING SCHEDULE

Surface Temp.	Final Cure Immersion	Dry to Recoat or Topcoat
50°F (10°C)	15 Days	5 Days
60°F (16°C)	10 Days	3 Days
75°F (24°C)	5 Days	24 Hours
90°F (32°C)	3 Days	18 Hours

**For CM 15 Dry to Touch is 5 hours at 75 °F (24 °C). Maximum re-coat/topcoat times are 30 days for epoxies and 90 days for polyurethanes at 75 °F (24 °C).**

\*These times are based on a 5.0-7.0 mil (125-175 micron) dry film thickness. Higher film thickness, insufficient ventilation or cooler temperatures will require longer cure times and could result in solvent entrapment and premature failure. Excessive humidity or condensation on the surface during curing can interfere with the cure, can cause discoloration and may result in a surface haze. Any haze or blush must be removed by water washing before recoating. If the maximum recoat time is exceeded, the surface must be abraded by sweep blasting prior to the application of additional coats. **Note:** This product contains conductive pigments and cannot be holiday tested.

## PRODUCT DATA SHEET

### APPLICATION EQUIPMENT GUIDELINES

Listed below are general equipment guidelines for the application of this product. Job site conditions may require modifications to these guidelines to achieve the desired results.

**Brush** | Recommended for touch-up only. Use a medium, natural bristle brush.

**Roller** | Use a medium-nap synthetic roller cover with phenolic core.

### APPLICATION CONDITIONS

Condition	Material	Surface	Ambient	Humidity
Minimum	40°F (4°C)	40°F (4°C)	40°F (4°C)	0%
Maximum	100°F (38°C)	110°F (43°C)	110°F (43°C)	90%

Industry standards are for substrate temperatures to be 5°F (3°C) above the dew point. This product simply requires the substrate temperature to be above the dew point.

**Caution:** This Product is moisture sensitive in the liquid stage and until cured. Protect from high humidity, dew and direct moisture contact until cured. Application and/or curing in humidities above maximum, or exposure to moisture from rain or dew may result in a loss of gloss and/or microbubbling of the product

### CURING SCHEDULE

Surface Temp.	Dry to Handle	Dry to Recoat	Final Cure General
40°F (4°C)	24 Hours	24 Hours	28 Days
50°F (10°C)	15 Hours	15 Hours	14 Days
75°F (24°C)	6 Hours	6 Hours	7 Days
90°F (32°C)	3 Hours	3 Hours	4 Days

These times are based on a 3.0-5.0 mil (75-125 micron) dry film thickness. Higher film thickness, insufficient ventilation or cooler temperatures will require longer cure times and could result in solvent entrapment and premature failure.

**\*Maximum recoat times are indefinite.** Surface must be clean and dry. As part of good painting practice it is recommended to test for adhesion by wiping the surface with Thinner 25. If the film shows a slight "tack" the surface is suitable for recoating without extensive surface preparation such as abrading.

Carboline Additive 101 can be used to accelerate the film forming process in this product for conditions outside of the parameters of this data sheet. Carboline Additive 101 is added at a rate of 1.0-2.0 oz per mixed gallon or a maximum of 6 oz per mixed five gallons. At this addition rate, Additive 101 will accelerate the cure rate of the urethane product between 25-40% depending on the substrate temperature range and reduce the pot life of the product by approximately 40-50% of that stated on the product data sheet. With the use of Additive 101, this product will continue to cure at temperatures as low as 20°F (-7°C).

### CLEANUP & SAFETY

**Cleanup** | Use Thinner 2 or Acetone. In case of spillage, absorb and dispose of in accordance with local applicable regulations.

**Safety** | Read and follow all caution statements on this product data sheet and on the SDS for this product and use personal protective equipment as directed.

**Ventilation** | When used in enclosed areas, thorough air circulation must be used during and after application until the coating is cured. The ventilation system should be capable of preventing the solvent vapor concentration from reaching the lower explosion limit for the solvents used. User should test and monitor exposure levels to insure all personnel are below guidelines. If not sure or if not able to monitor levels, use MSHA/NIOSH approved supplied air respirator.

## **PART 5 – SPECIAL SPECIFICATIONS**

---

---

### **NOTICE:**

City of Muskegon Standards for Materials and Construction pertaining to pavement, watermain, sanitary and storm sewer construction may be all, partially or not included in this document; they are however, to be considered in full force and effect.

---

---

## 5.0 SPECIAL SPECIFICATIONS

5.0.1 GOVERNING ORDER - The Technical Specifications, which include the City of Muskegon Standard Specifications for construction and materials shall govern the construction of this project except as modified by these Special Specifications.

5.0.2 CITY'S RIGHT TO REDUCE OR INCREASE QUANTITIES - Reference is made to Part 3, Section I, Number 38 of the General Specifications which gives the City the right to increase or decrease the total contract price 25% without penalty.

5.0.3 PERMISSION TO CONSTRUCT - The Contractor shall obtain permission from the Engineer or Project Inspector before proceeding with construction of any of the following items:

- a. Concrete Curb and Gutter
- b. Trench Repair
- c. Base Course
- d. Leveling Course
- e. Wearing Course
- f. Concrete Pavement
- g. Concrete Walk
- h. Drive Approach

Permission will be granted upon confirmation that all necessary labor, equipment and material are on the site, and the area is properly prepared.

5.0.4 LETTERS OF RECOMMENDATION IN LIEU OF PERFORMANCE BOND - In accordance with Section I, Paragraph 17(e), four letters of sincere recommendation may be presented to the City Manager in lieu of a performance bond when this Contract is under the amount of \$50,000 and the successful Bidder cannot produce the appropriate performance bond. To use letters of recommendation for this purpose, your intention to do so must be disclosed as part of your bid, so that a decision on acceptability can be made prior to the contract award.

5.0.5 SALVAGE MATERIALS - The Contractor shall become the owner of all salvaged cast iron, brass and lead products, including manhole and catch basin castings, goosenecks, stops, corporations, valve boxes, valves, and hydrants. Determination of the disposal site and disposal of the salvaged material is the responsibility of the Contractor. No payment shall be made for salvage disposal.

5.0.6 LIQUIDATED DAMAGES; TIME OF THE ESSENCE - The parties recognize that time is of the essence of this agreement, and that the City will suffer financial loss and be entitled to damages in the event it is not completed within the time stated above, and further if partial performance is not completed within the times provided for partial performance, if a schedule is attached to this agreement or included herein. The parties also recognize the delays, expense, and difficulties involved in proving actual losses suffered by the CITY if the work is not completed on time. Accordingly, instead of requiring any such proof the CITY and the CONTRACTOR agree that as liquidated damages for delay, (but not as a penalty) the CONTRACTOR shall pay the CITY Three Hundred Dollars (\$300.00) for each day that expires after the time specified for substantial completion set forth above, and the same amount for each day that expires after failure to complete partial performance if set forth in a schedule adopted in this contract. After substantial completion if the CONTRACTOR shall neglect, refuse, or fail to complete the remaining work within the time specified above for completion and readiness for final payment or any proper extension thereof granted by the CITY, the CONTRACTOR shall pay the CITY Three Hundred Dollars (\$ 300.00) for each day that expires after the time above specified for completion and readiness for final payment.

Only delays caused by labor disputes, fire, natural catastrophe or acts of God shall excuse the CONTRACTOR from the above payments. When the effects of such interruptions have ceased, in the reasonable opinion of the CITY, the said time limits shall be adjusted only for the period of delay caused thereby, and shall remain in effect as adjusted.

The foregoing provisions for liquidated damages shall, however, be in addition to and not in substitution for any other rights or remedies which the CITY may have under this agreement or otherwise against the CONTRACTOR by reason of its failure to complete construction within the time and in the manner required by this agreement.

5.0.7 DEFECTIVE MATERIALS AND WORK - All materials which do not meet the requirements of the specifications at the times they are to be used shall be rejected, unless otherwise authorized as acceptable by the Engineer.

Any completed work that may be found to be defective before the final acceptance of the completed work shall be corrected and replaced immediately in conformance with the Specifications.

The Contractor shall be responsible for any and all damages that the work may sustain prior to its acceptance, and shall rebuild, repair, restore and make good at his own expense, all injuries and damages to any portion of the work by the action of the elements or from any cause whatsoever prior to its acceptance.

5.0.8 CORRECTING WORK - Any unfaithful work or imperfect work or material that may be discovered before the final acceptance of the work shall be corrected and replaced immediately on the order of the Engineer. In case any material is rejected, it shall be immediately removed from the line of work and not again brought thereon. In case the order for removal and replacing as specified above is not promptly complied with after written notice, the Engineer shall be at liberty to remove and replace the same with proper materials, at the expense of the Contractor, and the cost thereof shall be deducted from the amount due him. Any omission to disapprove the work or material at the time of inspection or at the time of any estimate shall not relieve the Contractor of any of his obligations. All work or material of whatever kind which, during the progress of construction and before its final acceptance, may become damaged shall be removed and replaced by the Contractor with good and satisfactory work and material.

5.0.9 RETENTION OF IMPERFECT WORK - If any portion of the work done or material furnished under this Contract shall prove defective and not in accordance with the Contract Documents, and if the imperfection in the same shall not be of sufficient magnitude or importance to make the work unacceptable or impracticable, or will not create conditions which are dangerous or undesirable, the Engineer shall have the right and authority to retain such work instead of requiring the imperfect work to be removed and reconstructed but he shall make deductions therefor in the payments due the Contractor as may be just and reasonable.

5.0.10 ACCIDENT PREVENTION AND SAFETY - The Contractor shall comply with all Federal, State, and local laws and regulations governing the furnishing and use of all safeguards, safety devices, and protective equipment. He shall also take any other needed actions on his own responsibility or as directed by the Engineer as are reasonably necessary to protect the life and health of employees on the job, the safety of the public, and to protect property during the construction of the project.

Recommendation of the current Manual of Accident Prevention in Construction, issued by the Associated General Contractors of America, Inc., shall be used for guidance in specific situations which are not covered by Federal, State, or local laws or regulations.

Special provisions in polluted areas. The Contractor shall be responsible for determining whether work in all locations involved in this contract is subject to a governmentally required health and safety plan to protect workers and others from the effects of hazardous materials in proximity of the work, in the ground or water resources involved. In the event such a health and safety plan is required, the Contractor shall familiarize itself completely with the plan and comply with all its requirements.

In the event there is no health and safety plan for hazardous materials, but the Contractor reasonably should recognize that a health and safety plan is warranted, it shall be the Contractor's responsibility to notify the city before commencing work to obtain or produce, as city may require, a health and safety plan and implement it.

5.0.11 CONFINED SPACES - The Contractor shall have a Confined Space Policy and shall use all safeguards, safety devices and protective equipment necessary to comply with the current Federal, State and Local laws and requirements for practices and procedures for protection from the hazards of entry into confined spaces. Also, the Contractor shall make available all necessary tools, equipment and/or man power for city personnel entering

confined spaces to inspect the work performed or being performed by the Contractor. In the event Contractor determines that confined spaces exist in the project, it shall notify in writing, before commencing work, the location and existence of all confined places, providing sufficient documentation for city emergency personnel to respond to any and all situations requiring entry into or dealing with confined spaces.

5.0.12 SUNDAY AND NIGHT WORK - Ordinarily, no Sunday or night work shall be carried on which will require the presence of the Engineer or an inspector, except with the written permission of the Engineer. Sunday and night work is permissible in an emergency to the extent required to meet the emergency, but the Contractor shall notify the Engineer, as far in advance as possible, of his intention to carry on such emergency work and of the time and place of doing it.

5.0.13 BID TABULATION SHEET - The Bid Proposal sheet in these contract documents was created in Microsoft Excel. Any Contractor who would like to use this spreadsheet in preparing a bid may obtain an electronic copy from the Engineering Office by calling the Engineering Department at (231)-724-6707.

5.0.14 PUBLIC ACT NO. 57 OF 1998, SECTION 2 - A contract between a contractor and a governmental entity for an improvement that exceeds \$75,000.00 shall contain all of the following provisions:

- a. That if a contractor discovers 1 or both of the following physical conditions of the surface or subsurface at the improvement site, before disturbing the physical condition, the contractor shall promptly notify the governmental entity of the physical condition in writing:
- b. A subsurface or a latent physical condition at the site if differing materially from those indicated in the improvement contract.
- c. An unknown physical condition at the site is of an unusual nature differing materially from those ordinarily encountered and generally recognized as inhering in work of the character provided for in the improvement contract.
- d. That if the governmental entity receives a notice under subdivision (a), the governmental entity shall promptly investigate the physical condition.
- e. That if the governmental entity determines that the physical conditions do materially differ and will cause an increase or decrease in costs or additional time needed to perform the contract, the governmental entity's determination shall be made in writing and an equitable adjustment shall be made and the contract modified in writing accordingly.
- f. That the contractor cannot make a claim for additional costs or time because of a physical condition unless the contractor has complied with the notice requirements of subdivision (a). The governmental entity may extend the time required for notice under subdivision (a).
- g. That the contractor cannot make a claim for an adjustment under the contract after the contractor has received the final payment under the contract.

**CITY OF MUSKEGON  
SPECIAL SPECIFICATION  
FOR  
ALL PAY ITEMS**

**All Pay Items**

All pay items shall be constructed as specified in the Michigan Department of Transportation 2012 Standard Specifications for Construction, Michigan Department of Transportation Standard Plans and the Michigan Manual on Traffic Control Devices except where modified in these Special Specifications, MDOT Special Provision, and MDOT Special Details contained in this Proposal. Materials for all pay items shall meet the specifications as specified in the Michigan Department of Transportation 2012 Standard Specifications for Construction and Michigan Department of Transportation Standard Plans except where modified in these Special Specifications, MDOT Special Provision and MDOT Special Details contained in this Proposal.

## PROGRESS CLAUSE

**PROGRESS CLAUSE:** The Project shall not start until **April 1, 2020** and not until after receiving the Notice to Proceed. The Contractor shall not start work before date designated as the starting date in the detailed Progress Schedule approved by the Engineer. In no case shall any work be commenced prior to receipt of formal Notice to Proceed from the City of Muskegon.

No work shall occur and no lane closures left in place during the following events:

1. Seaway Run (June 27, 2020)
2. Lakeshore Art Festival (July 3-4, 2020)
3. Bike Time (July 16-19, 2020)
4. Unity Christian Music Festival (Aug. 5-8, 2020)
5. Irish Music Festival (Sept. 17-20, 2020)

The entire project shall be completed including open to traffic, final site restoration, pavement markings and clean-up on or before **November 15, 2020**.

Failure by the Contractor to meet the above requirements and dates will result in the Contractor being assessed liquidated damages in accordance with section 108.10 of the 2012 Standard Specifications for Construction. Liquidated damages will continue to be assessed for each calendar day or portion of the day that this work remains incomplete even if these days extend beyond the typical seasonal shut-down date of November 14<sup>th</sup>.

The confirmed low bidder shall submit a detailed "Progress Schedule", (MDOT Form 1130 may be used), to the Project Engineer at the preconstruction meeting. After receiving, reviewing and approving the completed Progress Schedule, the Project Engineer shall sign and forward the approved Progress Schedule to the Contractor.

Lack of a timely submittal and approval of the Progress Schedule by the Contractor, will result in the Project Engineer delaying contract award per subsection 102.15 of the 2012 MDOT Standard Specifications for Construction.

The Progress Schedule shall include, as a minimum, the controlling work items for the completion of the project and the planned dates that these work items will be controlling operations. When specified in the Bidding Proposal, the date the project is to be opened to traffic, as well as the final project completion date, shall also be included in the Progress Schedule.

If the Bidding Proposal specifies other controlling dates, these shall also be included in the Progress Schedule.

Failure on the part of the Contractor to carry out the provisions of the Progress Schedule, as established, may be considered sufficient cause to prevent bidding future projects until a satisfactory rate of progress is again established.

The starting date, contract time, or completion date for this project may be adjusted by the City of Muskegon without imposing liquidated damages upon the receipt of satisfactory documented evidence that unforeseen delays have occurred. The procedure for Progress Schedule, Contract Time Extensions, and Liquidated Damages will be pursuant to Section 108 of the MDOT 2012 Standard Specifications for Construction.

## **NOTICE TO BIDDERS**

### **UTILITY COORDINATION**

The contractor shall cooperate and coordinate construction activities with the owners of utilities as stated in Section 104.08 of the 2012 MDOT Standard Specifications for Construction. In addition, for the protection of underground utilities, the contractor shall follow the requirements in section 107.12 of the 2012 MDOT Standard Specifications for Construction. Contractor delay claims, resulting from a utility, will be determined based upon Section 108.09 of the 2012 MDOT Standard Specifications for Construction.

#### Public Utilities

Based on the proposed scope of work no utility conflicts are anticipated with the project. Contractor is reminded to contact MISSDIG prior to any excavation work.

## **PART 6 – MDOT SPECIFICATIONS**

MICHIGAN  
DEPARTMENT OF TRANSPORTATION  
  
SPECIAL PROVISION  
FOR  
**PROVIDING EXPOSURE ASSESSMENTS, EXPOSURE MONITORING, EQUIPMENT,  
HYGIENE FACILITIES, AND TRAINING**

OFS:EMB

1 of 3

APPR:JJG:DBP:07-05-16  
FHWA:APPR:07-05-16

**a. Description.** This work consists of providing exposure assessments, exposure monitoring, equipment, hygiene facilities, and training as required by Part 603 Lead Exposure in Construction, of the MIOSHA, to all of the Contractor's employees, FHWA employees, MDOT employees (including consultants), and to employees of Local Agencies who are acting as inspectors or project managers on any bridge painting projects or on any bridge repair or removal projects where welding, burning, or abrasive blasting of structural steel is being performed. This also applies to all construction work where an employee may be occupationally exposed to lead. All FHWA employees, MDOT employees (including consultants), and employees of Local Agencies who are acting as inspectors or project managers must have a medical evaluation, including a pulmonary function test, to determine the employee's ability to wear a respirator prior to receiving Contractor provided exposure training. The Contractor is responsible for requiring their employees to wear equipment and to use facilities provided by the Contractor; and for providing exposure assessments, exposure monitoring, equipment, hygiene facilities, and training in accordance with Part 603 Lead Exposure in Construction.

**b. Equipment and Facilities.** Provide the employee(s) protective clothing and equipment, change areas, showers, eating facilities, and hand and face washing facilities as required by MIOSHA's Part 603 Lead Exposure in Construction. Ensure the equipment and facilities are on site and fully functional prior to beginning any blast cleaning. Until the Contractor performs an employee exposure assessment and determines actual employee exposure for each job classification, the Contractor must provide to employee all items listed above plus respiratory protection, which must include the respirator, respirator training and fit testing, and a respirator program. Depending on the tasks, the Contractor must provide the appropriate respiratory protection until such time that exposure assessments results are complete. For manual operations, the respirator protection provided to the employee(s) must be based on anticipated (presumed) exposure levels greater than the Permissible Exposure Limit (PEL) [50 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ )], but less than 10 times the PEL ( $500 \mu\text{g}/\text{m}^3$ ). Provide the employee(s), at a minimum, with a half mask air purifying respirator with high efficiency particulate (HEPA) filters, which provides a respiratory protection factor of 10. For tasks such as rivet busting, or power tool cleaning without dust collection systems, the anticipated (or presumed) exposure assessment must be between 10 to no more than 50 times the PEL which requires a higher level of respiratory protection. For tasks such as abrasive blasting or torch cutting, the anticipated exposure assessment must be more than 50 times the PEL. If, through employee exposure assessment, the Contractor determines the actual employee exposure level, then the appropriate respiratory protection can be provided. Provide the employee(s) with protective clothing and equipment, change areas, and hand and face washing facilities as required by MIOSHA's Part 1, General Rules or other relevant safety standards, for removal of non-lead containing coatings.

**c. Exposure Assessment.** At a minimum, the Contractor must collect personal samples representative of a full shift including at least one sample for each job classification in each work area either for each shift or for the shift with the highest exposure level. Conduct the initial exposure assessment and any additional exposure assessments, and report the results in accordance with MIOSHA's Part 603.

Document the results of the employee exposure assessment(s) on the attached 'Lead Exposure Record' or another Contractor supplied form that reports the exact same pieces of data. Determine and report the results of the employee exposure assessment(s) in periods consistent with MIOSHA's Part 603. Conduct an exposure assessment of a MDOT employee designated by the Engineer. Forward MDOT employee exposure assessment results directly to:

MDOT  
Safety and Security Administration/Confidential  
Van Wagoner Building  
P.O. Box 30050  
Lansing, MI 48909

**d. Training.** Train all employees who are subject to exposure to lead and train employees as designated by FHWA, MDOT, or the Local Agency. Provide the following information at the preconstruction meeting:
